Description of Peer Involvement: 1 Certified Peer Specialist at each site

Service Goals: 50 YR1, 100 YRS2-5 (450 total)

Project Description: Utah’s Supported Employment Transformation Project (SETP) will utilize the Individual Placement and Support (IPS) evidence-based supported employment model. A primary component of this project will include forming a multi-agency coordinating committee that will develop and implement a collaborative sustainable funding initiative to expand and maintain robust supported employment services in Utah. The project will initially provide supported employment services to adults with serious mental illness and co-occurring substance abuse conditions, coordinated by two Local Mental Health Authorities across urban and rural communities.
